H. G. SAUNDERS,

SECRETARY ATLANTA CHAMBER OF COMMERCE

Chamber of Commerce Building,

MANAGER.

THE FRANKLIN PRINTING AND PUBLISHING CO.

1894.

Entered According to Act of Congress in the year 1894 by H. G. Saunders, at Washington, D. C., in the office of the Librarian of Congress.

INTRODUCTION.

Yielding to a very generally expressed desire that the 1894 Atlanta City Directory be issued and in the hands of its subscribers prior to the first of the year, the work on the book has been prosecuted much more rapidly than usual, and, thanks to the excellent facilities of the Franklin Printing and Publishing Co., I am enabled to issue this eighteenth volume one month ahead of the time of its usual appearance.

The arrangement and make-up is similar to previous volumes, with the addition of a Biographical Department, which is a new feature and one which is believed to be specially interesting and valuable, containing, as it does, only bare facts and eschewing fulsome write ups. The short time allowed to prepare the matter necessitated the omission of several sketches of really prominent citizens, from whom data could not be secured. This, however, will be remedied in the next volume of the work.

The Street Directory, which immediately follows the Biographical Department, contains descriptions of all the streets in the city, with the name of the occupant at each house number, and consists of 253 pages. The Directory proper, or alphabetical list, comes next with a total of 28,614 names suitably compiled from A to Z. Then follows the Business Directory of the city, which is in fact a complete epitome of mercantile, manufacturing and professional Atlanta. The one hundred pages which this occupies is the more valuable as it is a recital of actual facts and shows more eloquently than could be expressed by oratory or pen the wonderful diversification and extent of the business interests of the city. The last thirty-two pages contains data regarding the City, County and State Governments, Churches, Military, Secret Societies, Social Organizations and Clubs, Railroads, Street Railways, Postal and Courts information, all of which is valuable, but I regret to say is scarcely ever referred to, owing to the fact that it is not generally known that this matter is a part of the Directory.

It will be of general interest to know that the census of population, which has already characterized all my previous Atlanta Directories, has been repeated in this edition, and the results, while not coming fully up to either my hopes or expectations, are still highly creditable when the recent general business depression is taken into consideration. The canvass was made between September 15 and October 15, and during that time the total population of Atlanta, including West End, North Atlanta and the immediate surroundings—not, however, including Edgewood, Kirkwood or Decatur—was found to be 106,881, an increase over the year last passed of 2,460. These figures represent an actual count—not an estimate—and can be relied on.

December 16, 1893. H. G. SAUNDERS, Manager.

Descriptive and Biographical DEPARTMENT.

ATLANTA CITY DIRECTORY,

VOLUME XVIII.

1894.

CONTAINING

Short, Concise Description of Atlanta, and Biographical Sketches of Some of the Prominent Business and Professional Men to Whom She Owes Her Phenomenal Development.

This being the semi-centennial of Atlanta as a city, the publishers of the City Directory deem it of interest to the public to append some of the latest statistics and also some historical facts connected with the lives of some of the prominent citizens:

ATLANTA, GA., 1894.

A little more than a generation ago, in 1850, Atlanta's population was 5,000; in 1860 it was 9,555; in 1870 it was 21,788; in 1880 it was 37,409; in 1890 it was 65,533. With no pretense whatever to "boom," the increase continues to be unprecedented in the South; and the population is now 106,881.

Eleven railroads enter the city from all parts of the country. Several of them have their machine shops in the city, employing thousands of workmen each year. As a granite and marble center Atlanta outranks any city in America. Her marble fields near the suburbs are unequaled, while the product of the quarries, for durability and beauty, is equal to the very finest. The granite with which the streets of many Southern and Western cities are paved is obtained from the quarries near Atlanta.

The city is governed by a Mayor and board of thirteen Councilmen and six Aldermen. The Police force consists of 155 men, including officers, and is under the control of the Board of Commissioners. The Fire Department consists of eighty-three men, three steamers, one hose wagon, four reels, three hook and ladder trucks, about 16,000 feet of hose and a chemical. The Public School system, established in the year 1872, is regarded as nearly perfect as an educational system of any city can be. There are nineteen Public School buildings, with a seating capacity of 8,500; 120 teachers, to whom $65,000 is annually paid in salaries. The private educational institutions consist of three medical colleges, two dental colleges, a law school, four young ladies' seminaries, and two collegiate institutions for boys. The Georgia State Technological school is located here, and is engaged in a grand sphere of usefulness. In addition to this are six large institutions for the education of colored men and women. Ninety-seven church edifices are in existence, comprising all the recognized sects; two libraries, the Young Mens' Library and the State Library, together boast about 30,000 volumes.

There are about twenty banking institutions with a capital of nearly $3,450,000 (nearly doubling in four years), whose surplus and undivided profits amount to $1,140,645.39. On July 1st, when the lowest point is generally reached, the deposits amounted to $5,214,318.52, and the cash on hand was $1,348,311.45. The amount of uncollected checks and amounts due from other banks and bankers was $652,-754.73, while the amount due other banks and bankers was $220,-689.60

Her bonded debt January 1, 1893, was $2,954,000, bearing from four to eight per cent. interest per annum due from 1894 to 1923. Much less than one-half (in amount) bears more more than five per cent. interest, and much less than one-half (in amount) is due after 1910. Since 1879 bonds have been easily negotiated at five per cent. or less, all recent loans having been quickly taken at four per cent. While Georgia State bonds are quoted at 96 to 108, the bonds of Atlanta are quoted at 96 to 117.

The city owns choice personal, and elegibly located real property, worth, at a conservative estimate, $4,500,000.

There are one hundred and one miles of electric railway in the city. Many of the principal streets are double tracked. The facili-

ties for reaching the suburbs are unequaled. Street railroad building goes on every day.

The principal public buildings are, the State Capitol, the Court House, the Custom House, and the Chamber of Commerce Building. There are also some unusually fine office and church buildings and college structures. The principal manufactories consist of three large Cotton Mills, four large Furniture Factories, two Cotton Seed Oil Mills, a Brewery, four Manufactories of Fertilizers, thirteen Planing Mills and a Bridge and Iron Works; in addition to which Brick, Marble, Spring Beds, Patent Medicine, Trunks, Tinware, Glass, Show-cases, Terra Cotta, Saws and Paint are also manufactured to a considerable extent. Thirty-five miles of Atlanta's streets are paved entirely with Belgian block, and the city is lighted by elec tricity. Aggregate financial transactions of Atlanta Postoffice for the year, $3,000,000. Atlanta is the second largest horse and mule market in the world; last year's business amounting to about $5,000,000. Atlanta's new Water-works, recently completed, cost $500,000. Water brought from the Chattahoochee river, seven miles. Atlanta has an unbroken line of Railways to five South Atlantic and four Mexican ports.

The climatic advantages permit our merchants to carry stocks of merchandise through the summer with safety. Two hundred and twenty-six wholesale Mercantile Houses, with 1,000 travelers in the Southern States, do an annual business of over $95,000,000. Retail Mercantile Business of over $45,000,000. Six hundred and thirty-three manufactories. Capital, $16,500,000. Atlanta is within easy reach of coal and iron, and is only a few hours by rail from Birmingham, Chattanooga, etc. Climate is excellent the year round, and this has helped the growth of the city as much as any one thing. Atlanta is the great wholesale distributing point for the Southeast. It is also a great manufacturing center, and new enterprises are being continually started. The city is built almost entirely of brick.

Atlanta was incorporated as a city in 1847, and has been the Capital of the State of Georgia since 1868. It is the county seat of Fulton county, and is the largest and most important city in the State, 101 miles northwest of Macon and 171 miles west of Augusta. It is a modern, pushing, energetic city, and has reached the point when its future is assured. The first settlement on the site now occupied by the city was in 1839. A year or two later the place was called "Terminus." In 1843 it was a town, and had undergone another change in nomenclature, being then known as "Marthasville." In 1847 the name was changed to "Atlanta." It was the chief seat of war from 1861 until the close of the war, and in 1864 was entirely destroyed by the invading army of General Sherman.

Following will be found biographical sketches of some of the men who have helped to make the city what it is to-day. It will be noticed that these have been alphabetically arranged. It is regretted that the short time allowed to prepare the matter necessitated the omission of several sketches of really prominent citizens, from whom data could not be secured. This, however, will be remedied in the next volume of the work.

Floyd and General J. N. Williamson for the study of law, and after two years was admitted to the bar. Col. He is certainly one of the city's "pioneers" and amongst many other things he inaugurated the plan of subdivision here, and in his capacity as auctioneer has conducted some large sales. Col. Six months later was elected principal of the Hamilton Male Academy. In 1861 was made chief editor of the Columbus, (Ga.) Daily Sun, and in 1866 established in Atlanta, Ga., in conjunction with Col. John S. Prather, the Atlanta Daily New Era, of which he was editor until 1872, except eighteen months of Dr. Bard's editorship, when he was appointed by President Grant to the uncongenial office of United States Assessor of Internal Revenue for Georgia. He was a founder of the Young Men's Library Association and of the present admirable system of public schools of this city. In 1873 he was appointed Minister to Columbia, succeeding Gen. Stephen A. Hurlbut, in 1878; United States Consul to China, first at Chin Kiang, and then at Canton; in 1882 he declined the Consul-Generalship of Panama and two weeks later was appointed, unsought, Minister to Columbia a second time, resigning in 1886, and in 1888 was made Envoy Extraordinary and Minister Plenipotentiary to the Republic of Venezuela. Mr. Scruggs has been an able and successful journalist and diplomat. Intellectual and scholarly, his editorial writing was strong and finished. In politics, a Federalist Whig, and opposer to Jeffersonian Democracy, he found his views rather inconvenient in Georgia, but he maintained them with marked power and dignity, winning respect and friendship from the Democrats. Mr. Scruggs has shown a decided capacity for diplomatic service. Tactful, courtly and well versed in international law and diplomatic usage, he is an able minister, and in his nineteen years of diplomatic service has never had a suggestion of complaint from any source. While first at Columbia he was arbitrator in an old and vexatious dispute between that country and Great Britain, and his arbitrament pleased both Governments and was commended by his own, and has been a precedent in disagreements between South American Republics and European powers. The Columbian and British Governments gracefully presented him silver souvenirs of appreciation, accepted in 1877 when he was temporarily out of commission. Mr. Scruggs has been an able contributor to leading American and European magazines, such as the "Law Review," "Magazine of American History," "North American Review" and the "Political Science Quarterly" and has two volumes ready for the press. THE SYSTEM.

The system of teaching will be similar to that adopted in the best European schools of art, and will include instruction in drawing and painting from natural objects and life rather than from flat models.

ELEMENTARY.

Freehand (ornament), geometrical and perspective drawing.

Diplomas and Certificates will be granted for proficiency in the various branches of Art to students taking a three years' course

The Studios will be available, free of charge at any time during the week (lesson hours excepted) to students purchasing 12 tickets and taking not less than two lessons a week, and to stockholders or their nominees, desiring to continue their studies.

HOW
ADVERTISING PAYS.

No matter what the size of a business may be, experience has proved that generous advertising will bring a crop of sales as surely as generous culture will bring a crop of grain.—There is just one condition—the advertisement must be worth the attention of buyers.—"But how shall I attract attention?"—A great many intelligent men disagree as to what constitutes a good advertisement.—I pin my faith to a sketch.—A good-bright-sketch will attract attention anywhere.—Yet—a sketch alone is not always able to do the business.—It should be re-enforced by a concise statement in clear English, covering the merits of the article.—This combination—in my opinion—is irresistible.—It is founded on a trait in human nature which is universal—the love of pictures.—There is always a fringe of humanity around the store window of the picture dealer.—There is always a fringe of readers around a pictured advertisement.—Should you desire it—I will prepare an advertisement for you at a moderate charge.

The Electropoise

The Electropoise is a scientific instrument for the cure of disease without medicine. Based on new theories as to the cause and cure of disease, it deals with the electrical and magnetic conditions of the body and gases surrounding it in the atmosphere. The principal and most common need of the sick is Oxygen—pure Oxygen— and this the Electropoise supplies, by putting the system in such a condition that it absorbs Oxygen from the atmosphere.

The Electropoise is not a patent medicine; not a mysterious or miraculous cure; not a battery or belt, nor in any way akin to the many "electrical cure-alls" advertised.

It is a reliable and truly wonderful treatment, CURING diseases pronounced INCURABLE by eminent physicians. It is endorsed by the best people of this and adjoining States. The Company owning the Electropoise is composed of Southern gentlemen and some of the most prominent men of Georgia, Alabama and adjoining States are interested in it.

Many of the best and most prominent citizens of Atlanta own and advocate the use of the Electropoise.

Do not despair before investigating this wonderful treatment. We will be pleased to have all impartial investigators visit our office, whether they wish to buy or not.

Every genuine Electropoise stamped as above. Beware of worthless imitations and infringing counterfeits.
